# CLIQ® Connect

## The efficient locking solution for a mobile world

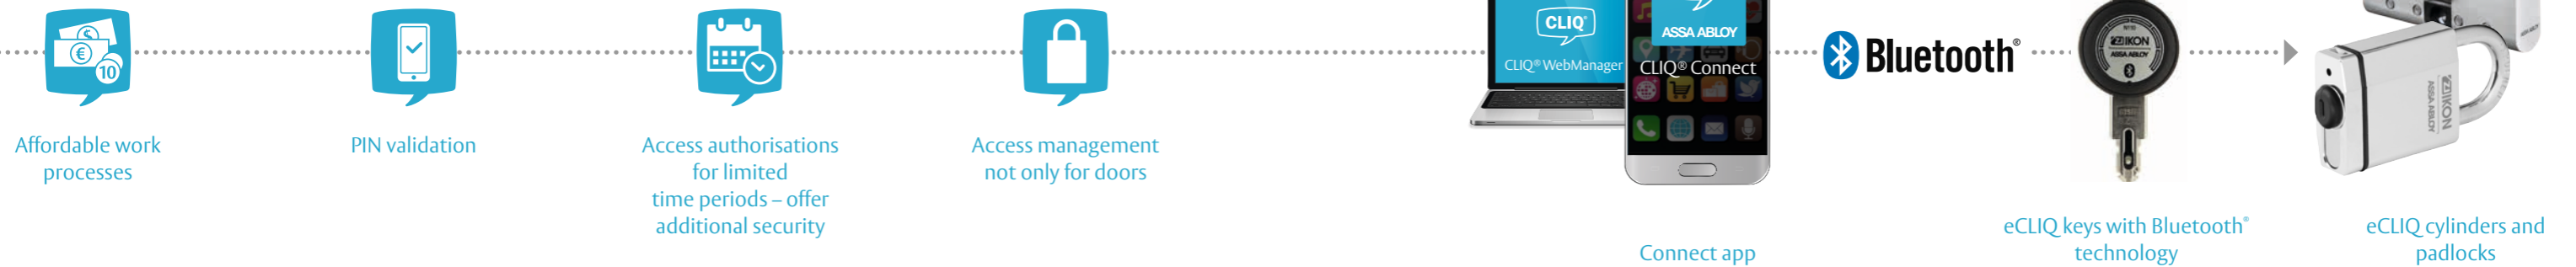

IKON - The lock specialist since 1926!

ASSA ABLOY, the global leader in door opening solutions

# The efficient locking solution for a mobile world

## CLIQ® Connect at a glance

CLIQ Connect ensures seamless mobile work processes

### Efficient locking solution for a mobile world

CLIQ® Connect is a supplement to the eCLIQ solution and makes it possible to update keys anywhere and any time via an iOS or Android device. Users can securely update their access authorisations via an app without an additional programming device. The transfer of new authorisations is done quickly and simply via Bluetooth® onto the eCLIQ key. The access authorisation can also be immediately deleted, as soon as the user leaves the location.

Advanced Bluetooth® technology in eCLIQ keys

Why is CLIQ® Connect the best solution for your access management?

- Affordable work processes
- Higher security thanks to very flexible access control management
- Support of PIN validation
- Simple use for administrators and employees
- Better control with immediate change of access authorisations, event lists and short validation duration for keys.

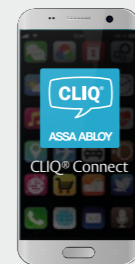

Convert to CLIQ® Connect now!  
\*\*\*  
Higher security and better work processes!

### And this is how it works

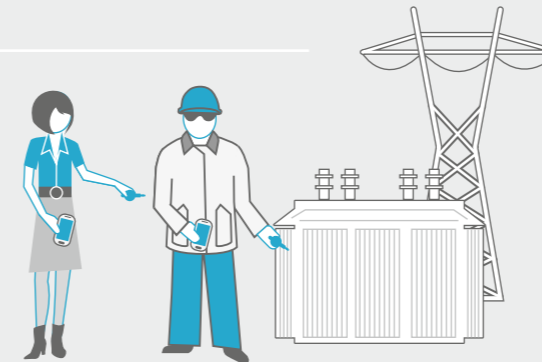

#### Administrator

- Management of access authorisations, revalidations and schedules for Connect keys
- Update of access authorisations if there is a connection to the app before opening the cylinder or padlock

#### CLIQ® Connect app

- Coupling of Connect keys
- Transfer of access authorisations, revalidations and schedules for Connect keys
- Transfer of event lists to Web Manager
- Support for PIN validation as of Web Manager 7
- Securely encrypted communication

#### Mobile employees

- Connect keys include access authorisations and transfer event lists
- High security thanks to short validation time of the Connect key (e.g. for lost keys)
- Connect keys can also be updated via desktop or wall programming devices
