

# eCLIQ – the new generation

I have  
**three times**  
more  
**energy**

The right key for  
every application

IKON – The master key system specialist since 1926!

Experience a safer  
and more open world

"No need  
to change a **battery** for  
**10 years** – it's fantastic  
to **work** with"

# Lasts up to 3 times longer

The Professional key impresses thanks to an extra-long battery life

With a battery life of up to 10 years or around 100,000 locking operations, the Professional key offers a convenient locking experience over a long period. It can also be equipped with an RFID chip where different information can be stored. The new "Professional" also impresses with its high-quality appearance, even more robust workmanship and an visual user display in the shape of a large LED window.

It is also able to support locking events with audible signals. Thanks to its robust stainless steel shaft and IP67 water resistance, the key is adept at handling the daily stresses and strains of everyday life.

CLIQ®

"My colleague  
**opens** the door to the  
transformer station for me –  
quite **simple** from the **office**"

The Bluetooth-enabled Connect key and your smartphone are the perfect team for access control. With a battery lifetime of up to two years, the Connect key can handle around 20,000 locking operations.

The Bluetooth function is activated via a button on the key. Each user can update time-restricted or loca-

tion-restricted access authorisations from anywhere using the CLIQ® Connect app. The new Connect key has a larger LED window and an additional blue LED for even better readability of user information.

The Connect key is ideal for decentralised organisations – but also for private end users as part of CLIQ® Go.

The ASSA ABLOY Group is a world market leader in access solutions. We help people to feel safer and more secure and experience a more open world every day.
