

SMARTAIR®

SMARTair® *i-minimal* One small change that changes everything

ASSA ABLOY
Opening Solutions

Style, intelligence and robustness come together
in *i-minimal*, the latest SMARTair electronic lock

Experience a safer
and more open world

Invisible on the outside, invincible on the inside

The new *i-minimal* is not just our most intelligent lock to date. It also combines the convenient features of electronic access control with the **security of an electromechanical lock**.

The *i-minimal* is compatible with all SMARTair systems (Standalone, Offline, Update on Card, Openow and Wireless online) and mobile access control solutions (Openow™ and TESA SMARTair Remote app).

New RFID reader module design, offered in two colours (black and white). Includes a warning LED in blue, green and red

Includes sensors which register the following events:

- Door left open
- Door incorrectly closed
- Intrusion
- Mechanical cylinder use

Any DIN-compliant handle is compatible with the new SMARTair Lock. Handle turns freely when door is closed

A mechanical half cylinder can be added for emergency mechanical key opening

Button for electronic privacy is always included

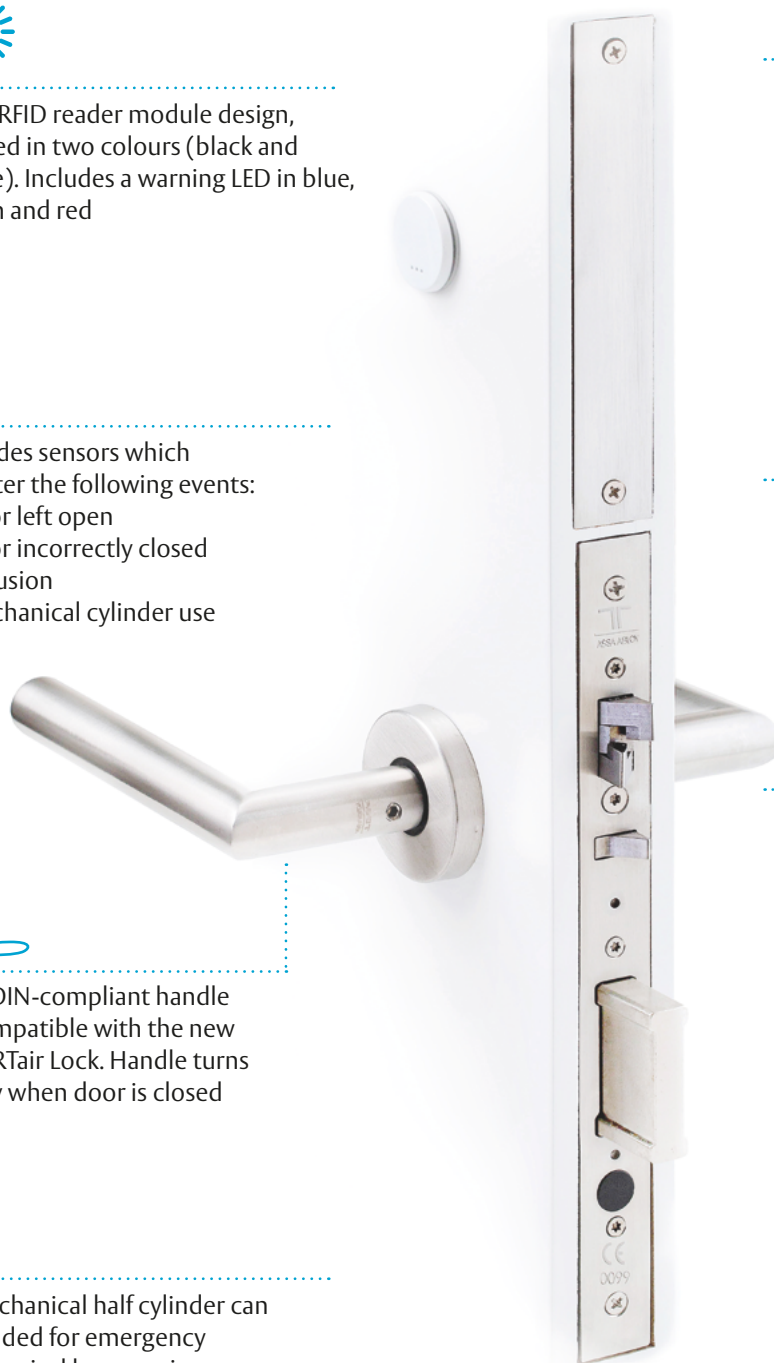

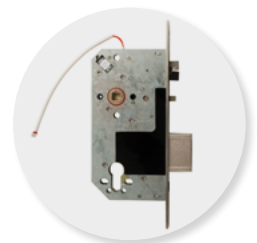

Bluetooth communication and Wireless online reporting with 1-2 year battery autonomy

EURO profile mortise lock includes a battery-powered electromechanical clutch

Automatic deadbolt projection (2.54cm) and panic function

Your Environment, your Lock

Designed to meet the access control needs of high traffic doors

i-minimal, the SMARTair wireless, battery-powered electronic lock, is built for anywhere with high traffic volumes, like universities, schools, hospitals, coworking spaces, offices, residential blocks and public buildings. It works with every SMARTair management option, online or offline.

i-minimal is perfect for doors where, for security reasons, convenient features of an electromechanical lock are required (including door position monitoring). *i-minimal* fits any style of decor or architecture, including the most avant-garde. Your new SMARTair Lock can be combined with any type of standard handle and makes access control safer, simpler and more efficient — reducing wasted time and expense.

Simple, stylish, powerful

- Behind a **simple, stylish exterior**, the *i-minimal* lock hides extraordinary strength. A robust electronic lock, it offers the greatest possible security
- The lock integrates easily with your existing SMARTair access control system
- Facility managers can make real-time decisions and react instantly to any on-site event
- Has been designed for fast and easy installation in environments where day-to-day security cannot pause, like coworking offices or student accommodation

Openow, compatible with all forms of intelligence

Welcome to the future of access control. *i-minimal* offers a new way to open doors: using the Openow mobile app. Your site users no longer carry separate credentials, just their smartphone. Security and facility managers boost their efficiency, sending, cancelling and modifying virtual keys whenever they choose.

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.
