

Signature Tower

Project Fast Fact

Location

Kuala Lumpur, Malaysia

Complete year

2019

Architect

Peter Chan Architect

Landscape Architect

Arkilandskap

Owner

TRX City

Feature products

Electric Strikes

Challenge

The 92-storey skyscraper is the anchor development for the financial district. It is an iconic 70-acre development in the heart of Kuala Lumpur set to become a leading centre for international finance and business.

Being developed by the Mulia Group, Indonesia's leading commercial and property developer, the 92-storey Signature Tower began construction early this year and is expected to be completed in line with TRX's first phase, which is expected to be in 2018-2019.

Solution

The tower is a office building which requires electro-mechanical hardware solutions. ASSA ABLOY Malaysia has worked professionally with local system integration company for electric strike solution for required doors.
