Scheduling Service

ASSA ABLOY has a skilled team of dedicated specifiers to help with all your door hardware specification needs. With such a variety of architectural hardware and locking solutions available, specifying the most appropriate product can be a challenge. Our architectural consultants will work with you to identify your needs and offer solutions on:

- Architectural Hardware
- Electric Locking
- Security
- Access Control
- Folding & Sliding
- Automatic Sliding Doors (Besam)

Openings Studio™

ASSA ABLOY Openings Studio™ Professional Version (PRO) is our full-featured, password protected suite of BIM software tools for creating and visualizing 3D doors, frames, and hardware objects and modifying their associated parameters for use in design, construction, and facility management.

- Web-based configuration engine instantly produces hundreds of “complete openings”, including curtain panel and custom frame/light applications, with schedulable associated parameters for downloading to libraries and projects.
- Doors, hardware, floor plans, and 3D building view of openings can all be displayed in the exclusive PRO visualizer panel.
- Built-in links and workflow tools for RFI's, change management, catalog and technical data sheets, installation and maintenance instructions, and sustainability and performance documents.

BIM SOFTWARE

Get acquainted with Openings Studio

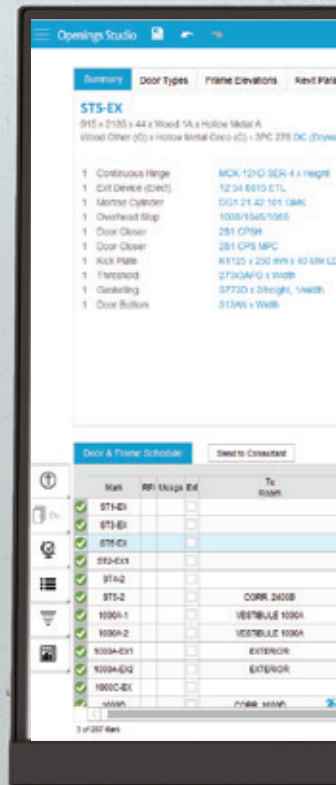

Seamlessly transfer project data from BIM design software for complete door hardware specifications and schedules.

Access manufacturer catalogues, technical data sheets, wiring diagrams, templates and more.

Create complete openings with doors, frames, hardware, and specifications and render the openings in 3D.

Track changes to door openings through the change log management system.

Produce formatted specifications matching 3D models for project contract documents.

Get to Know Openings Studio

Openings Studio is a software tool designed for all stakeholders in the building process and for the entire lifecycle of the building. It integrates directly with design software, such as Autodesk Revit®, to seamlessly transfer project data for complete door hardware schedules and specifications.

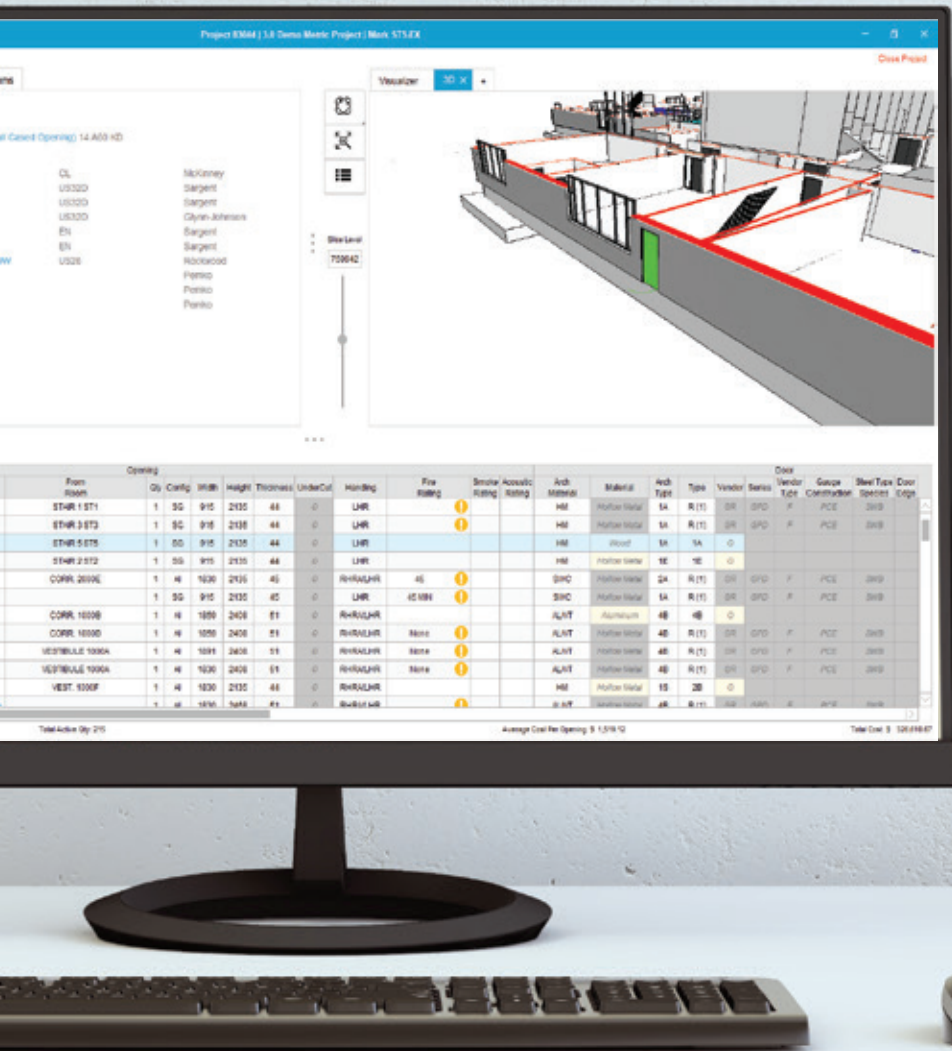

Easy Collaboration

Gain universal access to design standards for all stakeholders

ASSA ABLOY

Openings Studio

Save Time

More efficiently manage building projects

Eliminate Confusion

No more costly mistakes when communicating with spec writers

Digital Keyless Locks

What is SMARTair™ ?

SMARTair™ is a cable free access control system that is simple to install, configure, administer and maintain, offering an intelligent yet simple step up from keys. It's a cost effective alternative to traditional access control. No bells, whistles, or wires, just sleek, reliable security.

SMARTair™ gives you the security of knowing that lost credentials can quickly be prevented from gaining access, the flexibility to restrict user movements across your school, as well as the ability to show historical movement through audit trails.

No cables means no installation hassles, and a reduced cost.

Update on Card

- System operators use software to apply permissions to the users
- Cards carry their own data to the doors – no need for cabling infrastructure
- Perfect for difficult or impossible to wire sites
- Automatic revalidation of cards means no more lost card issues

Wireless Online

- System operators use software to apply permissions to the users
- Wireless hubs carry the data to the doors in real time
- Perfect for difficult, or impossible to wire sites
- Lock-down all the doors in the building with a single click

Stand-Alone

- No software requirement makes this the simplest access control system
- All programming is done at the door unit with a single programming card
- Perfect for smaller sites or where cost is a consideration
- Once installed, the system can be up and running in seconds

Opennow App (Mobile Access)

- System operators use software to apply permissions to the users
- Users receive virtual keys stored in SMARTair Opennow Smartphone App with email registration
- Over the air access plan update, door history collection and email alerts using the user's app
- Multiple site key access inside a single app, pin protection available.

ASSA ABLOY's new cabinet lock range is now the industry benchmark. The ML5000 Series has been developed for the most demanding government, commercial and institutional organisations.

There are two variations to choose from, Digital PIN Keypad or RFID, offering a range of features in both that meet the requirements of lockers in a range of applications such as:

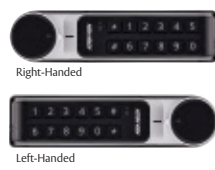

- **Schools**
- **Offices**
- **Leisure centres**
- **Sports clubs**
- **Health clubs**

Both Digital PIN Keypad and RFID variants are available in models that can be easily mounted; vertically or horizontally to suit your locker design. It offers safety security and convenience for your lockers and their contents.

ML52-READER

<ul style="list-style-type: none"> • Accepts up to 20 Administration Cards, 20 Master Cards, 20 User Cards per lock • Temporary wrong code lockout • Suits doors to 23mm thick • 3mm stainless steel cams • 96 hours salt spray tested

ML51-KP-VERT

<ul style="list-style-type: none"> • 12 digit Master PIN code. 4-12 digit user PIN code • Temporary wrong code lockout • Suits doors to 23mm thick • 3mm stainless steel cams • 96 hours salt spray tested

ML51-KP-LH (RH)

CORTEX™ is a commercial grade Digital Lockset that offers a standalone electronic access solution that can also be easily integrated to existing systems. Innovative locking coupled with the durability and quality that is synonymous with the Lockwood brand.

Features & Specifications:

- Easy Mode or Advance Mode function
- Up to 40,000 operations battery life (Card)
- Add/delete individual users with Master Code
- 40 Card users and 20 Pin Code users
- Cryptic Code Function
- Lockset includes 2 Access Cards (can add up to 40)
- Dual Security Credential requires that two users are present to unlock the door. One user will have Pin Code and the other user will have the Card
- Delayed Unlocked State allows the user extra time to open the door - ideal for elderly or disabled
- One Time Pin is designed to be used once and then automatically expires
- Battery check function allows users to check the battery level to understand when a battery replacement is required
- Passage Mode allows the users to toggle between standard and passage mode as required

Standards and Compliance

Successfully tested up to 2 hours on fire door assemblies in accordance with Australian Standard AS1905.1 2005 - Part 1: Fire Resistant Doorsets.

(Security) Australian Lock Standard (AS4145.2:1993).

(Durability) Australian Lock Standard (AS4145.2:1993).

Aperio technology is developed to complement new and existing electronic access control systems; providing end users with a simple, intelligent way to upgrade the controllability and the security level of their premises. The heart of Aperio is a short distance wireless communication protocol; designed to link an online electronic access control.

Key Features

- Easy installation
- Connects over standard interface
- No separate management software
- No change of cards
- Eliminates key management issues
- Authorisation changes in real time
- Encrypted communication
- Audit trails and time zones through existing system

C100 Cylinder

Converts any mechanical cylinder to an access control door.

K100 Cabinet Lock

Audit trail to medicine cabinets, cupboards, display cases, etc.

KS100 Data Cabinet Lock

Control access to data cabinets and servers. Data centre rack access solution.

AU100 Escutcheon

All in one door furniture and reader and keypad with key override and full door monitoring.

To view our full range of Aperio wireless access control products scan:

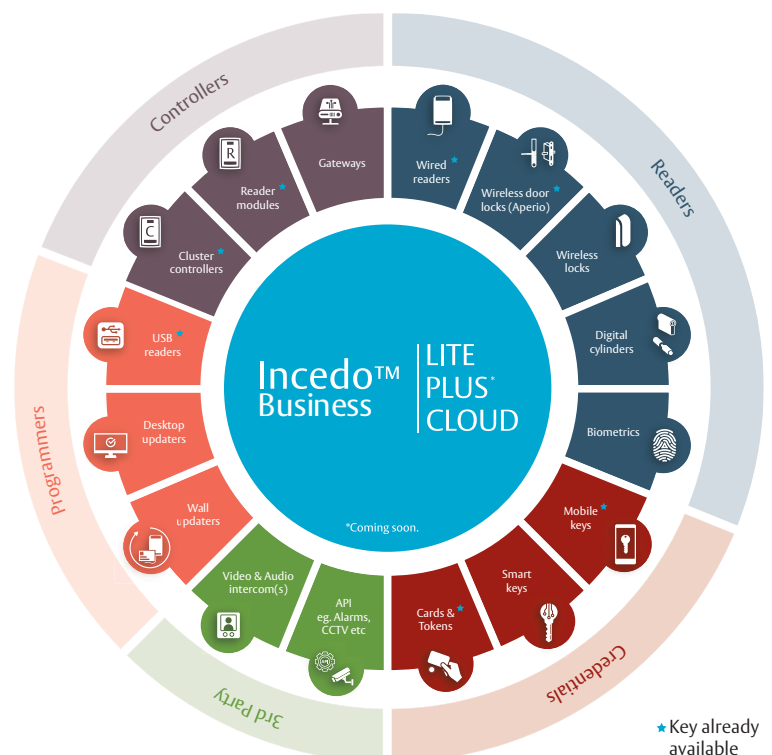

The world moves, your building security should move with it.

Incedo is an ecosystem combining ASSA ABLOY's world-leading range of access hardware and security solutions with flexible software and multiple management options. Incedo user interfaces are friendly, flexible, and easily updated to meet the changing needs of your business.

Incedo delivers the integration and connectivity your business demands, providing secure access points and advanced identification technology. It makes life easier and work more efficient for everyone, from installers to end users.

Incedo Business works for any building, leaving you free to focus on growing your business. It makes sure your employees, customers and goods are where they need to be Incedo Business.

The Integral Wireless Access Control locking system offers flexible and scalable management of your security needs, ensuring peace of mind for all users.

Key Features

- Uses RFID cards/fobs for access
- Simple to retrofit and install
- Easily expand the system as required – up to 9999 doors & unlimited users
- Available in two simple to use management options:
 - “Accommodation” allows you to manage the users and doors, similar to a typical Hotel system where the doors are predefined, and users are given access according to the length of their stay.
 - “Commercial” management software operates much the same but allows scheduling and calendar-events suited to a typical commercial building application.
- Simple solution requiring no IP networking knowledge.

Wall Reader	Encoder	Portable Programmer
		
<ul style="list-style-type: none"> • Programs all card types except for the Special IC card, which is used to activate the software management system • Plug-in-and-Play USB Card Encoder • Easily assign new users and cards, plus modify them or invalidate lost or stolen cards • Reads the audit trail of locks when cards are presented • Windows® based 	<ul style="list-style-type: none"> • For doors where Integral escutcheons are not fitted • RFID Door Access Controller Wall Reader can be used on an entry door as part of the complete wireless access control system. It can also be used on any other common area doors in the building • The RFID Door Access Controller Wall Reader can be used with a number of different electronic lock types. Compatible with electronic magnets, drop bolts, motorised locks and electric strikes 	<ul style="list-style-type: none"> • For configuring and collecting data from each lock • Synchronise lock data with the Integral software • Connects to PC using USB cable • Extract entry data (audit trail) from the locks (total of 2000 events in memory) • Extract multiple locks without uploading all records to the Integral software • Easily set the time of the locks • Checks card recorded information • Check lock configuration

ASSA ABLOY

Levers, Knobs and Handles

Proudly designed and assembled in Australia with Lockwood's trusted quality at its core, the new range of brass lever styles have been designed to integrate with the character of a building; providing aesthetic continuity throughout. Merging purity of form with function, the Brass Core range presents a collection of elegant lever designs that enhance the surrounding architecture. Doors and door hardware may be the most intimate points of contact we have with a building. We are affected by the way a door looks and the way the handle feels on the door.

For use on the following door furniture series

Lockwood Symphony Series door furniture is manufactured from high quality solid brass material. The comprehensive lever range matched with concealed screw fixings by way of threaded rose trims, provides a stylish look for the most elegant interiors. The accessory range includes cylinder escutcheons, emergency turns and disabled accessible turns. For installers, the unique turn mechanism adjusts to suit the thickness of the door and removes the need to cut tail bars to length.

WITH SONATA 45

1370 Series Brass Door Handles

WITH CANDENZA 78

WITH CHORUS LINE 97

PRODUCT SPECIFICATION	
Materials	All Lockwood roses and levers contained in the 1360 and 1370 series are of solid brass construction
Fixing	Roses are designed to fit back to back. If outside rose is specified with concealed fixing, then the inside rose must be visible fixed. Roses numbered 1360, 1362, 1364, 1370, 1372 and 1374 are concealed fixed, roses numbered 1361, 1363, 1365, 1371, 1373 and 1375 are visible fixed
Door Thickness	Synergy 3570 Series: 32mm to 50mm Lockwood 5260 Latches: 33mm to 50mm
Standard Finishes	Satin Chrome Brushed (SC)
Non-Standard Finishes	Chrome Plate (CP) Polished Brass (PB) Polyester Powdercoat (PC)
Special Finishes	Architectural Bronze (AZ) Architectural Bronze Unlacquered (AU) Antique Copper (AC) Polished Brass Unlacquered (BU) Satin Brass (SB) Oil Rubbed Bronze (ORB)

For a smart look choose this rectangular plate with bevelled edges and corners. It features concealed fixing on the outside plate.

Application: Designed for use with Lockwood Selector and Synergy Mortice Locks and Latches.

1800 Series Square Brass Plate Furniture

2800 Series Round Brass Plate Furniture

PRODUCT SPECIFICATION	
Door Thickness	External plates are supplied with fixing screws to suit door thickness between 32 and 45mm
Dimensions	166 x 48 x 12mm
Fixing	Plates are designed to fit back to back. If outside plate is specified with concealed fixing, then the inside plate must be visible fixed
Handing	Plates are not handed; levers may be reversed by removing the stop screw, except for handed levers and functions as shown in the ordering procedure
Standard Finishes	Satin Chrome Brushed (SC)
Non Standard Finishes	Chrome Plate (CP) Polished Brass (PB) Polyester Powdercoat (PC)*
Special Finishes	Architectural Bronze (AZ) Architectural Bronze Unlaqured (AU) Antique Copper (AC) Oil Rubbed Bronze (ORB) Polished Brass Unlaqured (BU) Satin Brass (SB)
Turn Functions	Turn functions feature a unique mechanism that automatically adjusts the length of the tail bar to suit a particular door thickness

Functional, yet elegant, these rectangular or round ended brass plates complement a wide range of levers.

Application: Designed for use with Lockwood Selector and Synergy Series short and standard backset mortice locks. Additionally there are functions that are designed to work with Lockwood 3580/3780 Series short backset mortice deadbolts.

Note: Certain lever designs are not compatible on short backset assemblies due to interference with the door stop.

4800 Series Square Brass Plate Furniture

5800 Series Round Brass Plate Furniture

PRODUCT SPECIFICATION

Door Thickness	External plates are supplied with fixing screws to suit door thickness between 32 and 50mm. Extension kits are available for wider doors
Dimensions	185 x 26 x 11.5mm
Fixing	Plates are designed to fit back to back. If outside plate is specified with concealed fixing, then the inside plate must be visible fixed
Handing	Plates are not handed; levers may be reversed by removing the stop screw, except for handed levers and functions as shown in the ordering procedure
Standard Finishes	Satin Chrome Brushed (SC)
Non Standard Finishes	Chrome Plate (CP) Polished Brass (PB) Polyester Powdercoat (PC)*
Special Finishes	Aged Brass (AG) Architectural Bronze (AZ) Architectural Bronze Unlaquered (AU) Antique Copper (AC) Oil Rubbed Bronze (ORB) Polished Brass Unlaquered (BU) Satin Brass (SB) Satin Brass Unlaquered (SBU)
Turn Functions	Turn functions feature a unique mechanism that automatically adjusts the length of the tail bar to suit a particular door thickness

The 200 and 202 Artefact Series Door Furniture is 162mm square. Concealed fixed plates have studs with internal threads located in each corner, visible fixed plates have corresponding countersunk holes and are fixed back to back through the door.

Application: Designed for use with Lockwood Selector 3770 and Synergy 3570 Series Mortice Locks; latches and push/pull doors.

200 Series Square Corner Plate Furniture

202 Series Round Corner Plate Furniture

PRODUCT SPECIFICATION	
Dimensions	162 x 162 x 3mm - aluminium 162 x 162 x 2mm - stainless steel and brass
Door Thickness	35 to 45mm standard. For doors 45 to 55mm thick, specify long fixing screws SP2000-208
Finishes Standard	Natural Anodised Aluminium (NT) Satin Stainless Steel (SS)
Fixing	Plates are designed to fit back to back. If outside plate is specified with concealed fixing, then the inside plate must be visible fixed
Finishes Non Standard	316 Marine Grade (MG) Polished Brass (PB) Polished Stainless Steel (PS) Powdercoat (PC)*
Handling	All plates are handed with the exception of plain plates and pull handles
Materials	Aluminium, brass and stainless steel

Note: When using flush pulls back to back the minimum door thickness is 40mm.

The 212 and 224 Artefact Series Door Furniture is 162mm long x 50mm. Concealed fixed plates have studs with internal threads located top and bottom, visible fixed plates have corresponding countersunk holes and are fixed back to back through the door.

Application: Designed for use with Selector 3770 and Synergy 3570 Series Mortice Locks.

3570 Series Electric Mortice Lock

The lock can be operated by push buttons, intercom systems and key switches or integrated with electronic access control systems for use with higher security devices such as keypads or card readers.

3782 Series Electric Mortice Lock

The lock can be operated by push buttons, intercom systems and key switches or integrated with electronic access control systems for use with higher security devices such as keypads or card readers.

The 3782 Series is available in a wide variety of configurations to suit varying requirements and is especially suited to narrow style or short backset applications.

PRODUCT SPECIFICATION

Synergy® 3572 Vestibule Mortice Locks

These locks have various latching functions which can be operated by key or handle outside and by turnknob, key or handle inside. For ease of selection specify primary lock. This lock can then be easily adapted to suit function required. These locks have various latching functions which can be operated by key or by a handle inside.

Storeroom Locking Latch

Cylinder Outside. Reversible.

Outside: Opened by key. Handle is always rigid.

Inside: Opened by handle at all times

Single Action Escape Latch

Cylinder Outside. Reversible.

Outside: Opened by key.

Inside: Opened by handle at all times.

Classroom and Office Locking Latch

Cylinder Outside. Reversible.

Outside: Opened by handle except when handle is made inoperative by key from outside. Key locks or unlocks outside handle.

Inside: Opened by handle at all times.

3572X-R	Right-handed
3572X-L	Left-handed

3572X-R	Right-handed
3572X-L	Left-handed

3572Z-R	Right-handed
3572Z-L	Left-handed

Anti-lockout Privacy Escape Latch

Cylinder and Escape Lever.

Outside: Opened by handle except when handle is made inoperative by turnknob from inside. Handle may be unlocked from outside by coin or screwdriver by operating the slotted emergency button.

Inside: Opened by handle at all times. Turnknob locks or unlocks outside handle.

Anti-lockout: Closing the door or operation of inside handle will 'kick-off' the locking feature, allowing the outside handle to become operative.

Anti-lockout Entry Door Lock

Cylinder and Turnknob. Handed.

Outside: Opened by key at all times. Opened by handle except when handle is made inoperative by key from outside or turnknob from inside.

Inside: Opened by handle at all times. Turnknob locks or unlocks outside handle.

Anti-lockout: Latching the bolt by key, closing the door or operation of inside handle will 'kick-off' the locking feature, allowing the outside handle to become operative.

Classroom and Office Locking/Latching Latch

Cylinder and Turnknob. Handed.

Outside: Opened by key at all times. Opened by handle except when handle is made inoperative by key from outside or turnknob from inside.

Inside: Opened by handle at all times. Turnknob locks or unlocks outside handle.

Anti-lockout: Latching the bolt by key, closing the door or operation of inside handle will 'kick-off' the locking feature, allowing the outside handle to become operative.

3572XAL	Left-handed

3572M-R	Right-handed
3572M-L	Left-handed

Anti-lockout Vestibule Set

Cylinder and Turnknob. Handed

Outside: Opened by handle except when handle is made inoperative by key from outside. Key locks or unlocks outside handle.

Inside: Opened by handle at all times. Turnknob locks or unlocks outside handle.

Anti-lockout: Closing the door or operation of inside handle will 'kick-off' the locking feature., allowing the outside handle to become operative.

Vestibule Set

Cylinder and Turnknob. Reversible.

Outside: Opened by key at all times. Opened by handle except when handle is made inoperative by turnknob inside.

Inside: Opened by handle at all times. Turn knob locks or unlocks outside handle.

Note: Part numbers shown above are for 60mm backset lock, if 89mm is required substitute 3 for 4 i.e. 45722-R, or if 127mm lock is required, substitute 3 for 5 i.e. 5572Z-R

Exit Door Latch

Exit Function Only. Reversible.

Outside: Handle is always rigid.

Inside: Opened by handle at all times.

3572WAR	Right-handed
3572WAL	Left-handed

3572XTR	Right-handed
3572XTL	Left-handed

3572R	Right-handed
3572L	Left-handed

Exterior and Exit Door Lock

Double Cylinder Escape Lock

Exit Function Only. Reversible.

Outside: Opened by key at all times. Opened by handle except when handle is made inoperative by key from inside.

Inside: Opened by handle at all times. Key locks or unlocks outside handle

Single Cylinder Escape Lock

Cylinder Inside. Reversible.

Outside: Opened by handle except when handle is made inoperative by key from inside.

Inside: Opened by handle at all times. Key locks or unlocks outside handle

Exit Door Lock

Cylinder and Escape Lever.

Outside: Opened by handle except when handle is made inoperative by turnknob from inside.

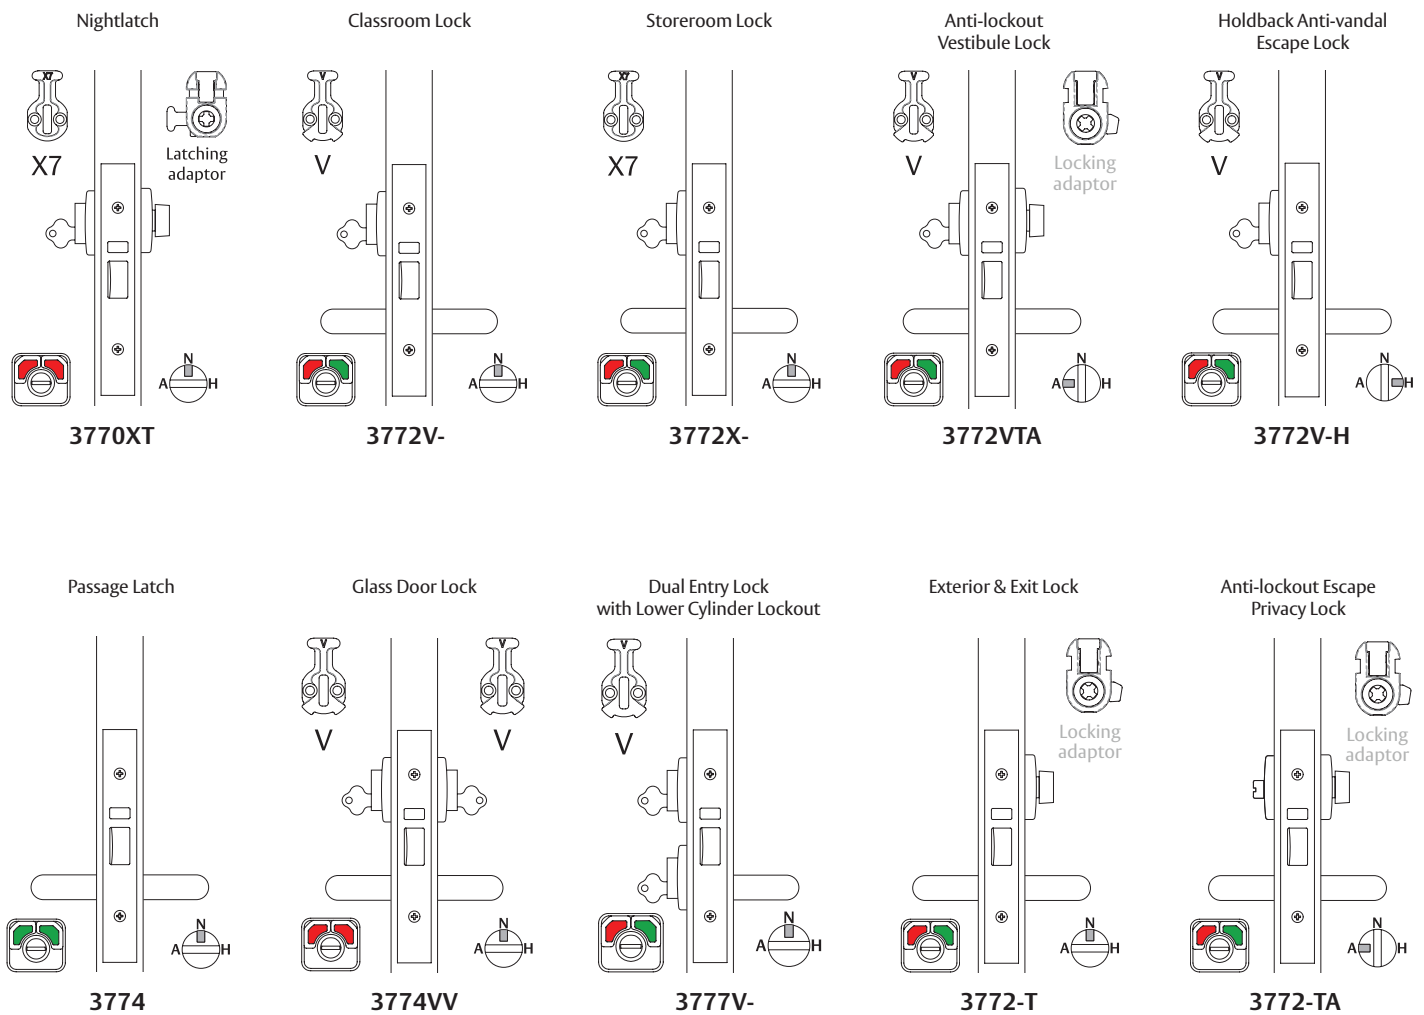

Inside: Opened by handle at all times. Turnknob locks or unlocks outside handle.

Note: Part numbers shown above are for 60mm backset lock, if 89mm is required substitute 3 for 4 i.e. 4572Z-R, or if 127mm lock is required, substitute 3 for 5 i.e. 5572Z-R

(ALL FIRE RATED DOORS TO HAVE A DOOR CLOSER)

3540 Short Backset Mortice Deadlock

Short backset, swing bolt deadlocks suitable for narrow stile hinged doors. Positive action deadbolt locked or unlocked by either key, turnknob, escape turn or lever handle. Suitable for sliding doors where lock can be mounted to door jamb and deadbolt engages strike mounted to face of door.

3541 Short Backset Mortice Hook Bolt

Short backset, swing-bolt deadlocks suitable for narrow stile sliding and swing doors. Positive action deadbolt is hooked to engage and lock into a latching or security strike when the bolt is in the thrown position. Deadbolt is locked or unlocked by either key, turnknob, escape turn or lever handle.

PRODUCT SPECIFICATION		
	3540	3541
Backset	23mm and 30mm	23mm and 30mm
Bolt	22mm projection sintered stainless steel	28mm projection sintered stainless steel. The bolt is hooked to suit sliding and swing applications and is chamfered for self latching
Door Thickness	Suits hollow stile door sections with 28mm internal thickness and 50mm maximum external thickness Timber Doors: 32 to 50mm	
Materials	High quality zinc alloy case	
Strikes		Latching strike for sliding doors and non latching security strike for swing doors to protect against jemmying

Electromechanical locking relies on the holding force of a low-voltage magnet for door security, making it perfect for commercial buildings experiencing high foot traffic. Additionally, they offer easy installation on glass doors for added convenience.

The unique and popular Lockwood/Trimec ES8000 V-Lock has been completely redesigned and engineered to produce the new ASSA ABLOY ES8100 V-Lock. Designed and assembled in Australia, with patents pending in various countries, the ES8100 incorporates many improvements over its Lockwood/Trimec predecessor, the ES8000, including a higher preload rating of 100kg, Door Position Monitoring, integrated LED lock status and diagnostics visual indication, increased door misalignment correction from 7mm to 12mm, an IP53 rating for external door applications and simple, one-step, PTO/PTL onsite configuration.

Although completely redesigned internally, the new ES8100 V-Lock body and faceplate retains the original footprint and is a direct retrofit to the original ES8000 model. The ES8100 strike plate utilises the same fixing locations but is 3mm wider to increase misalignment distance.

The ES8100, also known as the V-lock, contains a high torque motorised bolt which moves into a V shaped Strike Plate, pulling the door into alignment, when locked. The ES8100 may be mounted either vertically or horizontally but cannot be mounted in the floor.

The ES8100 V-Lock can be mortice mounted and concealed from view or surface mounted, with the inclusion of an optional mounting kit.

V-LOCK ES8100

ASSA ABLOY

Closers

2615 CAM Action Door Closer with Slide Arm

The Lockwood 2615 Series is a non-handed CAM Action Door Closer. Due to the CAM design this premium door closer is light to open but still strong enough to close a door.

The Lockwood 2615 Door Closer can be adjusted to meet the requirements of a light door opening resistance and is ideal for both interior and exterior doors. The Lockwood 2615 is light to open, but its adjustable closing force is high enough for heavy duty applications.

For disabled toilet applications where a breakout feature is required, the double action of the mechanism allows the door to be operated in the opposite direction for easy access into the room.

One model (2615) covers right hand and left hand applications, pull side/push side applications and also features an adjustable arm height.

2616 CAM Action Door Closer with Slide Arm

The Lockwood 2616 CAM Action Door Closer is a premium, high quality door closing device. When opening a door fitted with a Lockwood 2616 CAM Action Door Closer, the force required is less than that of a rack and pinion type door closer and continues to decrease through the opening arc.

This aesthetically appealing, narrow profile CAM Action Door Closer is suited for public and commercial applications where children, the elderly and the disabled are likely to be using the door.

The Lockwood 2616 is light to open, but its adjustable closing force is high enough for heavy duty applications.

One model (2616) covers right hand and left hand applications, pull side/push side applications and also features an adjustable arm height.

PRODUCT SPECIFICATION		
	2615	2616
Power	EN adjustable 1 to 5	EN adjustable 1 to 6
Back Check (BC)	Adjustable	
Hold Open	Adjustable. Hold-open can be set at any angle up to 120° of opening	
Handling	Non-handed. Suitable for left or right hand doors	
Cover	Formed metal cover	
Materials	Cast aluminium body manufactured from high-performance silicon alloy	
Mechanism	CAM action	
Mounting	Pull side, push side and over-door mounting	
Valves	Two pressure relief valves are a standard feature to protect against abuse	
Delayed Action	Adjustable	
Closing Speed	Adjustable	
Latching Speed	Adjustable	

Door closers guarantee the door's automatic return to the closed position post-opening, enabling the locking mechanism to activate and secure the door. Additionally, they provide the advantage of customisable closing speed and ease the force needed as the door swings open.

Valves	Adjustable closing and latching speed valves with overload protection			

Free-Motion® Door Closer

2636FS-SIL

The Free-Motion feature allows for a door to swing freely and with minimal resistance, rendering the door control body ineffective when supplied with power. The benefit being in allowing for hydraulic free operation in applications where end users may be hindered by forces produced by conventional door control. Ideal applications where this may provide an ultimate solution are Aged Care, Health Care and Educational Institutions.

5831 Series Low Energy Operator

As one of the world's only regenerative power door operators, the Lockwood 5831 Series Low Energy Operator has the ability to reduce energy consumption by as much as 100 percent versus other comparable operators. Available in wireless and plug-in versions and able to fit in the tightest of spaces, the 5831 Series is simple to install and use.

Close-Motion® Door Closer

DC700G-CM

Designed to enhance your specification...

...the latest evolution that works
with your architectural vision

Subtle contrast

Sophisticated and sleek, ASSA ABLOY door controls blend lightly contrasting colours and finishes to give a pleasing enhancement to the door design, perfect for all environments.

Definition and continuity

Strong lines combined with light metallic finishes make a powerful statement. The hallmark horizontal groove provides recognisable continuity from model to model.

Quieter by design

Close-Motion® integrates the damping mechanism unobtrusively into the guide rail, so its extra features do not detract from the hallmark ASSA ABLOY portfolio design.

Distinctive and modern

Contemporary in appearance, with neat chamfered edges that exude quality and robustness.

Smooth and robust

A distinct yet unobtrusive appearance achieved with soft angles and a double radius.

The ASSA ABLOY door control range is a 2018 winner of an Iconic Award for Innovative Architecture – the Iconic Awards are an annual international architecture and design competition established by the German Design Council.

Door closer with Cam-Motion® technology and integrated Close-Motion® element.

Innovative Cam-Motion® technology combines with an integrated damping device to close doors quietly, safely and securely at the speed you want. The door is pulled quietly and securely into the frame, allowing the locking system to latch the door into position. Close-Motion® minimises problems from draughts and differences in air pressure. No noise. No fuss.

Close-Motion® can be safely set to faster closing speeds as the unique damping feature preserves safety and silence by controllably slowing the door during the last few degrees of closing. With safety, noise, accessibility and security covered, Close-Motion® is ideal for environments ranging from hospitality to healthcare and encompassing education and commercial or government buildings.

Easy to install by design, it is simple to adjust the standard closing and backcheck controls.

Advantages at a glance

Close-Motion® technology

<p>1</p> <p>Provides, quiet and safe closing, minimising the danger of finger traps.</p>	<p>2</p> <p>Produces optimal damping when closing for quiet door closing action.</p>	<p>3</p> <p>Increases the closing force to pull the door securely into the frame.</p>	<p>4</p> <p>Closes doors reliably in environments when external wind pressure or air pressure differentials can be problematic.</p>	<p>5</p> <p>Combines with other ASSA ABLOY architectural hardware to create a complete door opening solution by design.</p>	<p>6</p> <p>Suitable for single and double-leaf doors*.</p> <p>* CE certificates applied for</p>

9800 Series Concealed Overhead Transom Door Closers

Lockwood 9800 Series Concealed Overhead Transom Door Closers provide a solution for applications where door control must be provided without disturbing the appearance of the door.

The closer fits into the transom above the door, most of the preparatory work is undertaken prior to installation, leaving minimal on site fitting.

Fully concealed door closers are designed to provide positive centring and door control on manually operated single or double action internal and external doors in schools, hospitals, clubs, factories, offices and commercial buildings.

PRODUCT SPECIFICATION	
Back Check (BC)	Built in back check from approximately 80°
Closing Angles	130° to 15°
Dimensions	Compact body size fits into 44.5mm x 100mm header section
Doors	Suitable for fire, metal, timber and glass doors
Door Thickness	Minimum 38mm
Door Weight	Maximum 115kg
Hold-open	Mechanical hold-open at 90° and 105°
Latching Angles	15° to 0°
Materials	Furniture body: high grade cast iron. Internal body: heat treated high alloy steel and ball bearings for optimum efficiency
Opening Angle	Maximum 130°
Pivot Point	70mm
Hydraulics	Stable hydraulic oil for a wide range of climatic conditions enabling constant operation
Valve	Built in pressure release valve protects closer from rough use

8800 Series

The Lockwood 8800 Series Floor Closers are designed to provide door control on manually operated double action doors in a wide range of commercial applications. The mounting kit provided with the Lockwood 8800 Series will suit glass, timber and aluminium frame door construction as standard.

ST8011SSS Floor Closer

The Lockwood ST8011SSS double action Floor Closer has been specifically designed to meet the exacting requirements of double or single action pivoted doors with a door leaf weight up to 300kgs. Innovative design enables onsite flexibility over a wide range of applications.

PRODUCT SPECIFICATION	
Door Adjustment	The Lockwood 8800 is positionally adjustable for a height of 4mm, a width of 10mm and a length of 9mm
Door Control	Two independent adjustment valves provide full hydraulic control from 130° to 15° of closing and 15° to 0° of latching
Door Frame Type	Timber/aluminium/steel
Door Thickness	Minimum for timber 32 mm
Door Weight	Up to 120kg as standard
Door Width	Up to 1150mm (refer to selection procedure)
Finishes	Stainless Steel (SSS) Gold (GLD) Polished Stainless Steel (PSS) Other finishes on application
Hold-Open	Available in both non hold-open and hold-open versions. Mechanical hold-open 90° and 105° in separate units

PRODUCT SPECIFICATION	
Adjustable Closing-Speed	Adjustable Closing Speed: Closing 175deg - 15deg, Latching speed 15deg - 0deg
Back Check (BC)	The integrated mechanical back check function offers optimum protection for doors and walls. With these standard features built into one product this means there is only one model to specify and stock to cover a wide range of applications
Construction	Cast iron body. Three thermodynamic valves for consistent performance. Built in pressure relief valve. Cement box hot zinc plated steel Universal cover plate
Delayed Action	Adjusting this valve controls the closing time of the door between 170deg - 85deg
Door Specifications	Suitable for door weights up to 300kgs Leaf widths from 950mm - 1400mm Max opening angle 175deg
Hold-Open	By setting the HO valve the door can be set to hold open the door at any angle from 85deg to 170deg opening, to release door manually pull door closed
Power Adjustment	Turning the screw valve the power can be adjusted from EN size 3-6; closing force ranges from 24Nm to 60Nm

ASSA ABLOY

Exit Devices

Fluid Series

The next generation in the Lockwood Panic Exit Device range, the FLUID Series provides a fundamental means of escape whilst offering a completely unique locking mechanism and design aesthetic.

With this type of unique innovation, ASSA ABLOY continues to evolve in standardising the market. The Lockwood FLUID Exit Device range combines ergonomics and performance with a completely new type of axis mechanism and high security bolt system.

Features:

- Brushed Stainless Steel Bolt
- High level of resistance. Up to 500kg to each latching point.
- Tested to 1,000,000 cycles
- Auxiliary bolt activation from 1mm
- Effortless opening < 20N required
- Available in both vertical and horizontal latching positions in 2/3 point configurations
- Bar can be cut down to 350mm
- New fixing bracket and template design reduces installation time by up to 50%

Protect. Evacuate people safely

Secure. High vandal resistance

Optimise. A simple and efficient installation process

HORIZONTAL LATCHING

VERTICAL LATCHING

Exidor Range

The Lockwood Exidor series panic hardware offers a modern, aesthetically pleasing style giving optimum safety and security.

Features:

- Push bar activated panic exit device
- Available in configurations to suit single and double doors
- For use on timber and steel doors
- Surface mounted
- Shoot bolts and latch options available
- Suitable for doors up to 1220mm wide and 2440mm high
- Tested to 200,000 cycles
- Non-handed

Product Details

Handing	Field Reversible
Door Width	Maximum 1220mm, bar can be cut to size
Door Mass	Up to 200kg
Projection	98mm from door face
Finish	Silver (SIL) Epoxy powder coating

Standards and Compliance

Successfully tested on fire door assemblies in accordance with Australian Standard AS1905.1-2005. Fire Resistant Doorsets.

Conforms to the standards as set out in CE EN1125 -2015.

EXI296 - SIL
(REVERSIBLE PANIC LATCH)

EXI325EA - SIL
(LEVER OAD EURO
CYLINDER ORDERED
SEPARATELY)

EXI294 - SIL
(SINGLE PANIC BOLT)

EXI285 - SIL
(DOUBLE DOORSET
BOLT & LATCH)

EXI284 - SIL
(DOUBLE DOORSET
PANIC BOLT)

ASSA ABLOY

GEN6TX®

GEN6TX®

GEN6TX® keys are supplied with the new FP2 feature. The FP2 feature provides increased protection via a two-way stop-surface system. One or both shoulders on the key will contact stop surfaces on the barrel, but there are three-barrel types mixed to randomize the active stop surfaces.

GEN6TX® keys are fully backwards compatible with Generation 6 and GEN6T systems. Generation 6 or GEN6T keys cannot be used with GEN6TX® barrels.

GEN6T Coding

ABLOY

ABLOY Technology

All ABLOY® locks are based on the unique operating principle of rotating detainer discs. Inside the ABLOY® cylinder, a series of discs rotate and function like those in a safe. Only the correct key, turned 90 degrees, will rotate the discs aligning the side bar gates. After the discs are aligned to the correct opening combination, the locking bar drops into the aligned slot allowing the lock to open. To withdraw the key it must be turned in the reverse direction until it stops. This will mechanically scramble the discs.

ABLOY® PROTEC²

ABLOY® PROTEC² is the latest milestone in the development of the unique ABLOY® rotating disc cylinder keying system that offers several unsurpassed and superior security features and benefits.

ABLOY® PROTEC² is a keying system technology platform that can be used to create master key systems, key alike systems or to individually key a range of cylinder variations to suit most locks available in the Australian market. Extensive master keying capabilities and unsurpassed features and benefits offered by the rotating disc mechanism ABLOY® PROTEC² employs makes it the right choice for building or infrastructure projects large or small.

ABLOY® SENTRY

ABLOY® SENTRY is a new evolution of the unique ABLOY® rotating disc technology that provides a smooth and reliable function in every environment.

ABLOY® SENTRY is a patented cylinder platform specifically designed for professional end users and original equipment manufacturers. It is an ideal solution whenever high security and resistance in harsh conditions is needed. ABLOY® SENTRY is offered in a range of cam locks, cabinet locks and padlocks.

With ABLOY® SENTRY your security is ensured today as well as into the future. ABLOY® SENTRY worldwide patents are valid until 2027.

ABLOY® PROTEC² CLIQ

ABLOY® PROTEC² CLIQ is a true one key solution where CLIQ keys are able to operate both the electromechanical and mechanical cylinders.

ABLOY® PROTEC² CLIQ is a very cost effective solution. CLIQ cylinders are installed in areas which require electronic features such as audit trails, time limited access and easy blocking of lost keys. Those areas could for instance be the perimeters, storerooms or server rooms. Mechanical ABLOY® PROTEC² cylinders are then installed in the other areas.

ABLOY® NOVEL

Superior master keying features are offered based on our vast number of key combinations. In an ABLOY® NOVEL locking system, different products can be keyed into one master key system and thus all products can be operated with just a single key whether the application is a door, gate, drawer or closet. The range is wide providing the possibility to create extensive master key systems that fulfill your exact specifications.

ABLOY® NOVEL is an excellent solution for new builds as well as when upgrading existing locking systems. With ABLOY® product range, the core always remains the same. The outer covering can be changed according to need to meet local standards and applications – so far in more than 80 countries.

A new dimension in high-end digital security solutions

Secure mobile access control for critical infrastructure protection.

Introducing ABLOY® BEAT – our growing, keyless product range for critical infrastructure protection. These mobile and smart innovations are a step towards a new era of fully connected, digital access control. Powered by Seos® credential technology, the BEAT solutions provide exceptional security and privacy protection specifically designed for critical infrastructure. They are always in sync with your security situation and add efficiency to your operations.

- BEAT keyless padlock – high-end Bluetooth® lock for all weather conditions
- BEAT controller for keyless access control
- Keyless entry with convenient mobile app
- Integrated access control – manage with CIPE Manager or add into your existing workflow
- Secured with Seos®, specifically made for critical infrastructure protection
- Increased security, efficiency and convenience

Managed with ABLOY OS or integrated with 3rd party systems

Aeron® Window Actuator

Aeron® Window Control System

Aeron is a comprehensive solution that combines convenience, flexibility and safety. With the ability to control multiple windows through the user-friendly Yale Home app, it revolutionises the way you interact with your home. Customisation is key with the Aeron system. Utilising groups, you can configure the system to match the unique layout of your home or commercial building, making it ideal for managing hard-to-reach windows.

Features & Benefits

Wide window coverage

Simultaneous operation

Intuitive app controls

Easy installation

Secure window seal

Durable construction

Adjustable chain length

Versatile compatibility

Connects with:

Add the Yale Connect Plus Hub 2 and module to easily monitor and control your Yale products from your smartphone. Add the remote control for easy access.

Specification Guide

Step 1. Specify Actuators

Specify **one actuator** for window less than 900mm:

A.

Actuators

YAR/WSWA/1/BLK

YAR/WSWA/1/P

YAR/WSWA/1/SPEC

QTY:

Specify **two actuator** for windows between 900mm and 2400mm

B.

Actuators

YAR/WSWA/1/BLK

YAR/WSWA/1/P

YAR/WSWA/1/SPEC

QTY

Specify one synchronisation loom for each double actuator installation

Sync Loom YAR/SWAA/SSL

Total number of actuators (A+B):

Total number of synchronisation looms:

Step 2. Specify Power Supply

One power supply can power up to two actuator. For double actuator windows, the same power supply must be used for both actuators

Power Supply

YAR/SWAA/SPS

QTY:

Step 3. Specify Hub

One Hub can connect up to 30 actuators and 4 remotes

Connect Plus Hub 2

YAR/SWAA/HUB

QTY:

Step 4. Specify Remote

4 Remotes maximum per system

Remote

YAR/SWAA/ZRT

QTY:

Step 5. Specify Rain Sensor & Adaptor (coming soon)

Optional. Specify maximum one rain sensor per system

Rain Sensor and Adaptor

YAR/SWAA/SRS

QTY:

Lockwood Flush Bolt (FB100, FB150, FB200)

The Lockwood range of flush bolts are manufactured from premium brass material and are designed for use in timber door applications to secure the inactive leaf of a set of double doors. Recessed into the edge of the door and completely concealed when the door is in the closed position. The flush bolt range is available in a variety of lengths to suit most applications.

Yale Flush Bolt (P3513, P3512)

The Yale flush bolt range is used for safe bolting of aluminium doors and windows. The 7mm diameter plated steel rod provides high security and is activated by a strongly constructed die-cast zinc body and operating lever with comfortable finger grip.

Flush Pulls (FP1-120, FP1-150, FP2-120, FP2-150)

Lockwood Stainless Steel Flush Pulls can be used on any door where a 'flush with the door face' pull is desired including sliding or cavity doors. The internal edges of the flush pull handles are finished for comfort of use and to soften aesthetics.

Toilet Indicator (L550, L811, L801)

Easy to install, surface mounted toilet bolts with an indicator to denote whether a room is occupied or vacant.

Hinges (LLW10075)

The 100 Series Architectural Hinges are designed to provide an effective solution to hanging doors where there is a need for high grade architectural quality hinges. Suitable for both interior and exterior applications.

Braille Signage (BRS1700, BRS1701, BRS1703, BRS1706)

Each plate consists of embossed tactile design, English text and braille lettering. The embossed components use standard imagery and fonts to ensure vision impaired non-braille readers can decipher the sign.

Door Stops (A250, A280, A350)

Lockwood offers door stops for wall and floor mounting with quality design, finish and appearance.

DOOR STOPS

HINGES

BRAILLE SIGNAGE

The Arrow E Series status indicator deadbolt provides the ultimate in privacy assurance with bold visual indicators on both the inside and outside of the door. The Arrow E Series status indicator uses an emergency key override to unlock the door from the outside in case of emergency.

This product is ideal for use in public restrooms, dressing rooms, nursing mothers' rooms and other areas requiring visual communication of use and assured privacy.

General Specifications:

- **Housing** - Solid one-piece construction with a decorative scalp.
- **Thru-bolting** - Supplied with two 1/4" steel thru-bolts.
- **Deadbolt** - 1" (25mm) throw, solid steel deadbolt with hardened, free spinning, steel pin insert.
- **Backset** - 2-3/8" (60mm), 2-3/4" (70mm)
- **Deadbolt Front** - 2-1/4" (57mm) x 1" (25mm) standard for 2-3/8" (60mm) backset, 2-1/4" (57mm) x 1-1/8" (29mm) standard for 2-3/4" (70mm) backset. Drive - in deadbolts are available.
- **Door** - 1-3/8" (35mm) to 1-3/4" (44mm) thick standard.
- **Strikes** - Supplied standard with the #395 strike kit (includes #345 metal frame strike and #346 wood frame strike).
- **Handing** - Shipped for right hand door installation. Converts for left hand door use with easy to follow instructions. No tools required.
- **Emergency Key** - The deadbolt can be unlocked from the outside with an emergency key.
