Digital
Door lock

Intelligent Biometric Digital Door Lock YDM4109

One-touch Fingerprint Verification Method (Easy Scan)

Easy Scan technology has been applied to Conveniently read a fingerprint in one shot without the need to open or conveniently close the cover to enter a fingerprint.

Voice Guide

The Voice Guide lets you know the operation status and how to set each feature and mode.

Smart Touchpad

To prevent the password from being exposed due to residual fingerprints after opening a door, a new technology has been adopted to complete the door opening process by touching the keypad with a palm after entering the password.

Anti-panic egress with Safe Handle

For convenience and in case of emergency, the door is automatically unlocked whenever the inner lever handle is used. The safe handle will protect from any break-in attempts.

Automatic locking

Yale Digital Door Lock series automatically locks a door after checking it is properly closed. (Manual operation is also available.)

Remote control (Optional)

A remote control option that works on floating ID technology is also available. It has a range of 50m.
